About Byron & Speak to Students

Byron Wolt is a speaker your students are not likely to forget.

Known as the “Guy with the Crazy Tie” or the “Speaker in Sneakers”, Byron’s humorous stories & motivational message of empowerment have been able to **GET, KEEP & DIRECT** the **ATTENTION** of student audiences on three continents.

Byron brings his experience into EVERY presentation.

Combining a BA in Developmental Psychology with vast experience working with youth from diverse backgrounds and in a wide range of settings, including over 3,000 hours speaking to students in schools, Byron is uniquely qualified to speak to student audiences.

Whether your students are apathetic or passionate, focused or distracted, high achieving or struggling, **Speak to Students** presentations are relevant for **YOUR STUDENTS.**

Get Information

My name is **Byron** and I **Speak to Students**. I connect with students; I **GET, KEEP, and DIRECT** their **ATTENTION**.

I started **Speak to Students** to engage students. With my interactive format, I encourage student interaction and facilitate student involvement. My message supports teachers with an outside voice to reinforce relevant messages and connect what students learn in school to their world outside of the classroom.

I am able to create real connections with students because I am:

Experienced. I have experience speaking in schools. I delivered over 3,000 presentations to large and small groups of students in 300+ rural, urban, and suburban schools. Presentations I wrote have been used by more than 150 speakers in high schools and colleges across 26 states and in Japan.

Passionate. I volunteered with kids since I was a kid myself. I started coaching youth sports in middle school and still coach today. I worked full time with kids at the Boys & Girls Clubs of Minneapolis while earning my BA in Developmental Psychology. I drive thousands of miles per year, getting up early, battling traffic and weather to speak to students. After all these years, I continue to be inspired and motivated by the many students, parents, teachers, and coaches I meet everyday. I LOVE what I do!

Student Centered. It’s about students. Since I was a challenging student (*understatement*), I work harder to get, keep, & direct the attention your students. **I promise to bring the energy and passion** needed to help ALL OF YOUR STUDENTS relate my message to their experiences, their goals, & their dreams.

Classroom Friendly. I provide an outside voice that students are receptive to. I reinforce curriculum with content to ensure my presentations are not only student friendly, but teacher approved. My message is continually adapted based on feedback from both students and teachers. I’ll bring as much energy into my last hour of the day as I had in my first hour.

Relevant. The message in my presentations will reach your students and challenge and empower them in school and in life.

Funny. I tell stories and make your students laugh with classroom appropriate humor. When students laugh, students learn, and retain.

Flexible. Big groups, small groups, keynotes, workshops, seminars, a full day of the same presentation or different presentations all day long; I want it to be **EASY** to have **Speak to Students** in your school. **I work with you to meet your needs.**

Affordable. I don’t want tight budgets to get in the way of my speaking to your students. *I have **GREAT BARGAIN PRICING!!!*** I even allow you access to my online presentations for a full school year at NO COST. All my presentations come with handouts and resources and a **MONEY BACK GAURANTEE**. If your teachers or students are not impressed, let me know – I’ll refund your money.

"For the past five years, Byron Wolt adeptly spoke to my senior classes"
Vicki Mickelson, Minneapolis Washburn High School

Betty Thomas, Minnesota Association of Educational Office Professionals Conference Chair

*Bringing Students a
World of Experience*

Our students today are more diverse than they have ever been—and becoming even more diverse. No matter where they live, students have more connection with cultural differences than ever before.

As Stephen R. Covey said “*Strength lies in differences, not in similarities*”. But what good is our diversity if students don’t know how to embrace it?

Understanding diversity is required for students to be successful in the rapidly changing and interconnected world in which we live. With its interactive and entertaining format, **Diversity Matters** helps students embrace diversity and develop empathy to connect with people who are different than them.
